

Sigma Xi Fall 2024 Lecture: Professor Daniel Barowy, Computer Science

"Do I Still Have to Learn How to Program a Computer?"

With its ability to whisk away the mundane, one naturally wonders if AI can tackle the ultimate tedium: programming. In this talk, we explore the likely future where AI-assisted coding is not only the norm, but one where training in computer science is consequently more important.

"Reading petroglyphs is hard! Maybe we should ask a human."

**Bronfman Auditorium,
Wachenheim Science Building
Thursday, November 21st
4:15-5:15 PM**

Daniel Barowy is an Associate Professor of Computer Science at Williams College, specializing in the design and implementation of programming languages.

Professor Barowy joined Williams in 2017.
